

# Chekero

**Chekero is a large loose tomato suitable for protected cropping. This variety produces highly uniform fruit with an average fruit weight of around 180-200g and good shelf life. It has excellent colour which intensifies into the winter months.**

## Disease Profile

HR	ToMV:0-2/Pf:A-E/Fol:0,1/For
IR	On

## Features

- // Consistent fruit size and shape with uniform setting up the plant
- // Early fruit set with intense colour at ripening
- // Medium plant vigour and balanced plant habit

## Advantages

- // Good shelf life and quality
- // Long cropping potential for return on investment
- // Early harvest and sales opportunities
- // Healthy crop

## Benefits

- // Attractive and quality fruit means higher market acceptance and economic return with less waste
- // Longer harvesting period allows for an improved yield per m<sup>2</sup>
- // Good production in the first part of the season allows growers to capture high early market prices

## Agronomics and Cropping Tips

### Environment

- // Greenhouse (Low-medium tech)

### Season

- // Year round

### Specific advice

- // Chekero offers early fruit set with intense colour at ripening
- // The plant has medium vigour with long cropping potential

# Chekero
