

# Bazelet

**Bazelet is a strong plant suitable to different soil types. The Lebanese cucumber has the potential for a longer growing season and better coping capacity under harsh conditions than the market standard. A multi-fruiting variety with high marketable yield potential.**

## Disease Profile

HR	WMV/ZYMV/Ccu/Px
IR	CMV/CVYV/PRSV

## Features

- // High Resistance to Powdery mildew
- // Stable fruit size and excellent fruit quality
- // Wide adaptability
- // Multi-fruiting with high total fruit production

## Advantages

- // More tolerant to soil and climate stress due to adaptability
- // Improved fruit quality allowing for greater market acceptance
- // High marketable yield potential

## Benefits

- // Strong plant
- // Good vigour with medium internodes
- // Balanced plant suitable for spring and summer cropping

## Agronomics and Cropping Tips

### Environment

- // Protected, Unheated

### Season

- // Spring, Summer, Autumn

# Bazelet
